

MUHAMMAD KASHIF LATIF

SOFTWARE ENGINEERING | FULL-STACK & BACKEND DEVELOPMENT

Lahore, Pakistan | +92 314 4253900 | kashif.latif2004@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science student with a 3.91 GPA and hands-on experience across three remote technical internships, full-stack product development, backend systems, AI-assisted applications, and deployment. Built and deployed university management, e-commerce, recommendation, real-time communication, and authentication-based applications using TypeScript, JavaScript, Python, Next.js, React, Node.js, Express.js, PostgreSQL, Supabase, and MongoDB.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C, C++, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, responsive UI development

Backend & APIs: Node.js, Express.js, REST APIs, authentication, role-based access, CRUD architecture

Databases & Tools: PostgreSQL, MySQL, MongoDB, Mongoose, Supabase, Oracle, Git, GitHub, Vercel

AI/ML Exposure: Classification, regression, clustering, recommendation systems, Generative AI and chatbot integration

EXPERIENCE

AI Engineer Intern | DecodeLabs

Remote | 2-month internship

- Built a Python rule-based AI chatbot and developed multiple machine-learning prototypes spanning classification and regression tasks, including customer-behavior prediction and electricity-bill estimation workflows.
- Worked with data preprocessing, feature selection, model training, prediction logic, and practical experimentation across Naive Bayes, SVM, Logistic Regression, Decision Trees, Random Forest, Linear Regression, and K-Means projects.

Full-Stack Developer Intern | CodeAlpha

Remote | 2-month internship

- Developed and deployed multiple production-style web applications, including the Lumina Luxe e-commerce store, NexWalk e-commerce experience, and DishCraft AI recommendation application.
- Implemented responsive interfaces, product-focused user journeys, database-backed application flows, deployment, and AI-assisted recommendation features using modern JavaScript/TypeScript web technologies.

App Developer Intern | HexSoftware

Remote | 2-month internship

- Built customer-facing application interfaces and login/authentication flows, focusing on usability, structured navigation, form handling, and a clean end-user experience.
- Practiced end-to-end application development from interface design and client-side logic through testing and deployment.

SELECTED PROJECTS

COMCAT University Management Portal | Next.js, TypeScript, PostgreSQL, Supabase, NextAuth | Live / GitHub — Full-stack academic administration platform with separate Admin, Teacher, and Student portals; supports authentication, role-based access, students, teachers, subjects, attendance, fees, admissions, enrollments, announcements, API-driven CRUD workflows, and an integrated AI chatbot.

Lumina Luxe E-Commerce Platform | Next.js, TypeScript, Supabase, PostgreSQL | Live / GitHub — Deployed full-stack jewelry e-commerce application with a 700+ item catalog, product discovery, persistent cart/wishlist, authentication, checkout flow, order management, customer interactions, analytics, and an admin dashboard for catalog and order operations.

Advanced Real-Time Chatroom | Python, Sockets, Multithreading | GitHub — Engineered a multi-user client-server communication system supporting public/private messaging, rooms, file sharing, and audio/video communication using Python socket programming and concurrent server handling.

DishCraft AI Recommendation App | JavaScript, TF-IDF, Cosine Similarity | Live / GitHub — Built and deployed a content-based recommendation application that converts user food preferences into feature vectors, computes similarity, ranks matching recipes, and provides fallback logic for new or sparse preference inputs.

Additional Deployed Work | TypeScript, Next.js, JavaScript | GitHub — NexWalk e-commerce application, DigiWallet web application, GPT-style conversational UI, Trust Mark Real Estate client website, portfolio sites, and multiple smaller JavaScript/Python applications available through GitHub.

EDUCATION

BS Computer Science | Minhaj University Lahore | GPA: 3.91/4.00

Sep 2024 - Expected 2028
